Sayl®

Fewer parts, less material, and still everything
a good chair should be

Sayl
Designed by Yves Béhar

Good design, healthy support, and exceptional value are always attractive – and Sayl delivers all three. By using smart engineering to transform simple materials, we were able to make Sayl attainable for more people. Fewer parts and less material also mean a smaller environmental impact.

Sayl designer Yves Béhar and our development team considered and reconsidered every part of the design – and, in the end, created a full family of seating that sets the reference point in its class for quality, performance, and design.

Performance

Sayl's unframed 3D Intelligent® back lets you stretch and move, striking a healthy balance between support and freedom. The elastomer strands vary in thickness and tension to provide greater support in the transition areas along the spine and less everywhere else, to encourage a full range of seated movement.

The foundational shell of the upholstered work chair mimics the 3D Intelligent suspension, providing similar dynamic support in a more traditional back. An optional lumbar support is available on both work chair models and provides adjustment over a ten centimetre range.

Design

Inspired by suspension bridges – structures that deliver the most using the least material – Yves Béhar applied the engineering principles of these amazing structures to create Sayl. The Eco-Dematerialized™ design of the work chair and stool uses less material in more inventive ways to provide ergonomic support for people up to 159 kg (350 pounds).

Sayl's unframed back and Y-Tower® support create a striking visual aesthetic that reveals both the designer's inspiration and intent. Whether you choose the full-suspension or upholstered back, an expressive colour palette gives you plenty of options for personalising your chair.

The construction of Sayl's 3D Intelligent suspension back provide integrated PostureFit® sacral support, which empowers your body to maintain a healthful upright posture with less fatigue.

The frameless 3D Intelligent suspension back allows freedom of movement while providing proper support.

The back of the upholstered work chair and stool, shown here with adjustable lumbar support, is engineered to mimic the dynamic support of 3D Intelligent suspension.

About Yves Béhar

A graduate of the Art Centre College of Design, Yves Béhar started out working with high-tech Silicon Valley clients, eventually gravitating to the sport, apparel, technology, and furniture arenas. His admiration of Charles and Ray Eames first attracted him to Herman Miller. “Design is very much at the centre of Herman Miller’s culture,” he says. “So one day I just picked up the phone, called them, and said, ‘Let’s work together.’” His collaborations with Herman Miller include Sayl chairs and Public Office Landscape™.

The following information applies only to Sayl work chairs.

Overview

Maximum User Weight 159kg/350lbs
Population Range 5th–95th Percentile

Back Support

PostureFit Sacral Support Standard
Adjustable Lumbar Support Optional

Seat Height

Extended-Height Range 419–559mm

Seat Depth

Fixed Seat 406mm
Adjustable Seat 406–457mm

Tilt Options

Tilt Limiter
Tilt Limiter with Seat Angle

Arm Options

No Arms
Fixed Arms
Height-Adjustable Arms
Fully Adjustable Arms
